Teddy Waning Scientific Nuclear Apprentice Nuclear Waste Services

Teddy Waning, an 18-year-old Scientific Nuclear Apprentice at Nuclear Waste Services, actively participated in Dream BIG & Cumbria Traders Workshops for primary-age. He now chairs the CFL Steering Group and is supporting Nuclear Waste Service's Dream Placement week, having done his own placement with them in 2022. Expressing his desire to volunteer Teddy said:

“I am very passionate as a young person to have as much involvement as I can in early careers. In this case, not necessarily helping them to a specific career path but planting the seed at a young age to interest them and start them thinking about careers so that they can become comfortable with the idea rather than having it become a worry in the last years of secondary.”

“Throughout the workshop, it was very easy to get involved, with no prior experience required and no demanding activities, just be yourself and the rest comes with it. The session was definitely enjoyable, a nice break from the office spent with many fresh and enthusiastic minds which could be quite excitable at times. A very positive afternoon.”

“I would recommend this to anyone of any background. Any experience that anyone has is worth presenting to the youngsters. The more careers that they are presented with, the better”
